

# Training Day 30 Report

**Date: 19 July 2025**

The thirtieth and final day of Web Development training was dedicated to finalizing the project report, creating documentation, and presenting the Alumni Management Portal. We reviewed all modules, summarized the project flow, and compiled a complete project file for submission.

## 1. Final Project Documentation

Wrote an overview of the Alumni Management Portal

Documented core modules:

User Registration & Login

Alumni Records Management

Feedback System

Admin Dashboard & Authentication

Added screenshots and code snippets to explain features

Included database structure and table descriptions

## 2. Presentation Preparation

Created a basic presentation using Google Slides / PowerPoint

Included key topics:

Problem Statement & Objective

Features Implemented

Technologies Used (HTML, CSS, PHP, MySQL)

Project Screenshots

Challenges and Learnings

Practiced explaining the portal's flow from both user and admin perspectives

## 3. Hands-on Practice

Polished portal UI and fixed minor styling issues

Cleaned up code comments and formatted files

Compiled the final ZIP of the project folder with database dump

Submitted project and gave a mock demo to peers/trainers

#### 4. Relevance to Project

Final documentation and presentation complete the development cycle. These ensure that the portal is understandable to evaluators and maintainable by future developers if extended.

#### 5. Learning Outcomes

Learned how to structure and write a project report

Gained confidence in presenting technical work

Understood the importance of documentation and version control

Successfully completed a full-stack web project from planning to deployment
